WE'RE EXCITED TO START MAPPING WITH YOUR TEAM

Digital asset mapping is an innovative tool to identify and connect to services and supports in your community. "Mapping" facilitates community participation for individuals with disabilities and their families.

Using digital community resource maps, you can:

- Enhance the person-centered planning process
- Create portfolios of individual strengths and experiences
- Build a library of resources to help families identify community services and supports
- Develop virtual maps to help with community navigation

Kansas

Through our hands-on workshops, we guide you step-by-step through our M.A.P.S. process. Our practical approach ensures that attendees leave with the tools and expertise needed to start mapping in their own communities.

When: September 16, 2021
Time: 10:00 am – 12:00 pm

Cost: \$30

How To Register: <https://www.eventbrite.com/e/maps-workshop-tickets-168346160899>
